Features and Benefits

- Reduced depth of SmartlockPro® Slim GFCI makes it easier to install in any electrical box, even shallow ones.

- Terminals allow for easy wiring options – back and side wire capable.

- External back wire clamps provide visual indication of proper wire seating.

- Withstands high torque and resists wire pullout.

- Standard brass self-grounding clip.

- Automatically test the GFCI every time the RESET button is pushed in. The GFCI will not reset if the GFCI circuit is not functioning properly.

- By blocking reset of the GFCI if protection has been compromised, SmartlockPro® Slim GFCI reduces the possibility of end-users incorrectly assuming that a reset GFCI outlet is providing ground fault protection when it actually is not.

- A line-load reversal diagnostic feature is provided which prevents the GFCI from being reset and stops power from being fed to the GFCI receptacle face or through to downstream devices. A green LED indicator on the GFCI's face also illuminates to alert the installer to the line-load wiring reversal.

- Trip threshold meets or exceeds UL requirements for tripping time.

- Improved immunity to high-frequency noise reduces nuisance tripping.

- Advanced electronics design provides superior resistance to electrical surges and over-voltages.

- Compatible with all Decora devices and wallplates; available in select Decora colors.

- UL Fed Spec WC-596 rated.
