

# P5543 Angle Adapter

## Description

To calibrate gauges with the pressure connection on the rear (for example, panel mount gauges) in their correct operating position, an angle adaptor should be used. The angle adapter uses the standard gauge adapters and positions the gauges at 90°. The maximum working pressure of this unit is 10,000 psi (700 bar).

## Specifications

Specifications	
<b>Body materials</b>	Stainless steel
<b>O-Rings</b>	Nitrile
<b>Test Port Adapters</b>	As supplied with calibrator
<b>Calibrator Connection</b>	3/8 BSP male (mating adapter supplied)
