

# Smart PIR Wall Switch Sensor

## Description

The Leviton Smart Wall Switch Occupancy Sensor (ODS15-xxx) uses Passive Infrared (PIR) detection technology to monitor a room for occupancy using a segmented, tamper resistant lens. A specialized lens divides the field-of-view into sensor zones. When a person passes in or out of a sensor zone, the sensor detects motion and switches the lights ON. The lights will remain ON as long as an occupant is moving through the sensor zones. The ODS15-xxx's vacancy mode features manual-ON/ auto-OFF for installations where manual-ON switching is required for energy code applications. A "minor motion" zone detects small body movements allowing the lights to stay ON even though a person may not be moving or walking around the room. The "major motion" zone, exhibits a lesser degree of sensitivity and requires larger movements.

Configuration of the ODS15-xxx is made using the Leviton Smart Sensor App from a smartphone or other Bluetooth®-enabled Android or iOS device. Simple configuration can also be applied using pushbutton setup for several popular pre configured options. The ODS15 integrates a photocell for daylighting hold-OFF which can be programmed using the Leviton Smart Sensor App.

## Applications

- Office
- Small Lobbies
- Meeting Rooms
- Single Occupant Restrooms

## Features

- Can be used to comply with ASHRAE 90.1, IECC, and 2025 Title 24, Part 6 occupancy/vacancy sensing, dimming, and manual-ON/auto-OFF requirements
- Fits in a standard wallbox and gangable with other units
- Use the Leviton Push to Pair (P2P) process to create a multi-way system for up to 5 devices
- Controls LED lighting loads up to 10A
- One relay module for single-level switching
- 180° field-of-view provides approximately 1,100 square feet of coverage
  - Latest PIR technology accurately detects minor motion up to 400sq ft and major motion up to 1,100 sq ft
  - Maximum sensing distance in front of the sensor is 30-40 feet and 15-20 feet on either side
- Integrated photocell for daylighting hold-OFF
- Advanced configuration can be performed using the Leviton Smart Sensor App on any Bluetooth-enabled Android or iOS device:
  - Set the operating mode for Occupancy (auto-ON/auto-OFF) or Vacancy (manual-ON/auto-OFF)
  - Adjust sensitivity and timeouts
  - Enable the integrated photocell for daylighting hold-OFF and select target daylighting hold-OFF levels
  - Activate the nightlight and select nightlight color
  - Set a security code to lock configuration settings
- Out-of-the-box configuration default mode:
  - Auto-ON/Auto-OFF with 10-minute timeout
  - Sensitivity set to 75%
  - Nightlight and daylighting disabled
