# Cold Shrink ${ }^{\text {mi }}$ Jacket Kits SJ-1A, SJ-2A \& SJ-3A 

Data Sheet

## 1. Product Description

$3 \mathrm{M}^{\mathrm{TM}}$ SJ series Cold Shrink ${ }^{\mathrm{TM}}$ Splice Jacket Kits are a series of open ended, tubular, rubber sleeves that combined with Scotch ${ }^{\text {TM }} 2228$ Rubber Mastic Tape provide a sealed jacket over cable splices installed on Jacketed Concentric Neutral (JCN) and other types of jacketed power cable. The Scotch ${ }^{\text {TM }}$ 2228 Rubber Mastic Tape provides for an assured sealing interface between the cable jacket and the Cold Shrink ${ }^{\mathrm{TM}}$ Jacket tube. It is also used to seal around a cable ground conductor. The Cold Shrink ${ }^{\mathrm{TM}}$ Jacket tube is provided in an expanded state, mounted on two inner supporting plastic cores. As supplied in this prestretched condition, the tube is ready for field installation. The jacketing tube is made of EPDM rubber which contains no chlorides or sulfurs. Three kit sizes cover an application range of $0.95^{\prime \prime}(24 \mathrm{~mm})$ to $4.0^{\prime \prime}$ (101,6 mm).

## Kit Contents:

Each kit contains sufficient quantity of the following materials to jacket one cable splice.

- 1 Cold Shrink ${ }^{\mathrm{TM}}$ Jacketing Tube
- 1 Three Foot (914 mm) Roll Of Scotch ${ }^{\text {TM }} 2228$ Rubber Mastic Tape

## Features:

Easy to install, requires only workman's hands. Simply center over splice area and unwind core from each end to shrink in place.

Versatile one-piece jacket that accommodates a wide range of cable sizes and splice diameters.

No torches or heat required.
Seals tight, retains its resiliency and pressure even after years of aging and exposure.

Tough rubber formulation to withstand rough back filling.
Water resistant. Meets the water seal requirements of ANSI C119.1.

Compatible with cable jackets and cable semi-conducting insulation shields.

Provides for a seal around cable ground conductor.

Resists fungus.
Resists acids and alkalies.
Resists ozone and ultraviolet light.

## 2. Applications

To jacket inline splices installed on Jacketed Concentric Neutral (JCN) Cables rated 15, 25 and 35 kV and operating temperature of $90^{\circ} \mathrm{C}$ and an emergency overload rating of $130^{\circ} \mathrm{C}$.

Physical protection and moisture sealing inline splices installed on shielded power cables having solid dielectric insulation as follows: polyethylene (high and low density), cross-linked polyethylene (XLP) and ethylene propylene rubber (EPR).

For use at indoor and outdoor installations including direct burial, aerial and submersible applications.

*3M 5411R QSII requires an additional 8428-12 Cold Shrink ${ }^{T \mathrm{M}}$ Tube to jacket splice. The procedure for jacketing the 5411R QSII is detailed in the $\operatorname{SJ}-1 \mathrm{~A}$ kit installation instruction.

Table 2

## 3. Maintenance

Components of the 3M SJ Series Cold Shrink ${ }^{\text {TM }}$ Splice Jacket Kit are not impaired by freezing or overheating due to ambient temperatures found in storage or shipping. Normal
stock rotation procedures are recommended. 3M Cold Shrink ${ }^{\mathrm{TM}}$ removable core material is polypropylene and recyclable with other $\underset{p p}{\hat{5} \text { pp }}$ waste.
'3M', 'Cold Shrink' and 'Scotch' are trademarks of 3M.
