

## Recessed Floor Boxes for Concrete

RFBA2C, RFBA4C, RFBA6C, RFBA10C

RFBA Series of Floor Boxes with round activations are versatile recessed activation solutions that provide power, communication and/or audio/video services to open space areas, or directly to workstations. The floor boxes come in various sizes and depths, including 2, 4, 6 and 10-gangs to best fit your specific application. The round activation boxes utilize existing Evolution™ series round covers and are designed to sit on top or flush with finished floor surfaces, such as carpet, tile, wood flooring, polished concrete or terrazzo. The RFBA series includes improved wire and cable routing, allowing for easier wire pulling in adjacent compartments and around corners.

The RFBA floor box is built for multiple applications and environments

### Features & Benefits

- **Suitable for Various Applications.** Steel and on-grade (epoxy coated) to meet your specific installation requirements with support for installation in carpet, wood flooring, tile, terrazzo and polished concrete.
- **Various Gang and Depth Options Available.** Choose from either 2, 4, 6 or 10-gang boxes to fit your application. The 2 and 4-gang options are available in either a shallow (3.25") depth or standard (3.75") depth box.
- **Common Mounting Plates.** All models share the same mounting plates, allowing for easier configuration and specification.
- **Numerous Conduit Knockouts.** Features knockouts on all sides and bottom of box to allow for greater installation flexibility to work within your environment.
- **Utilizes Evolution™ Series Round Covers.** Choose from a wide range of die-cast aluminum cover assemblies, available in powder coated finishes of black, gray and bronze, as well as durable finishes with brushed aluminum, satin brass plated and satin nickel plated.
- **Improved Cable Management.** Internal compartments feature improved wire and cable routing for easier wire pulling in adjacent compartments and around corners.
- **Post-Pour Features:** Allows for adjustment post-pour and features removable dividers that can be installed or removed before or after the concrete pour.

Round extension ring can be used to extend height of box up to 4 inches

All models share eight (8) common device plates, allowing for data and power within the same box

Compatible with existing Evolution Series die-cast aluminum covers. Choose from powder coated finishes or durable finishes.
