

## RadioRA 2 RF Maestro Local Controls

RadioRA 2 Maestro local controls function much like standard dimmers and switches, but can be controlled as part of a lighting control system. Local lighting controls are useful in locations where single circuits of lighting need to be dimmed or switched. Local fan speed controls are useful in locations where control of a single ceiling paddle fan is needed.

RadioRA 2 Maestro dimmers incorporate advanced features such as fade-on/fade-off, delayed long fade-to-off, and rapid full-on.

RadioRA 2 Maestro local controls include a Front Accessible Service Switch (FASS) for safe lamp replacement. RadioRA 2 Maestro local controls install in single pole or multi-location applications. Remote dimmers/switches are available for multi-location control.

Use Lutron Designer (Claro or Satin Colors) wallplates or designer-style wallplates from other manufacturers. Wallplates are sold separately. Lutron Claro and Satin Colors wallplates snap on with no visible means of attachment. RadioRA 2 Maestro local controls support color change kits.

## RadioRA 2 RF Maestro Local Controls

### Specifications

<b>Model Numbers</b>	<b>Dimmer:</b> RRD-6ND, RRD-10D, RRD-10ND, RRD-F6AN-DV, RRD-PRO <b>Switch:</b> RRD-8ANS, RRD-8S-DV <b>Fan Speed Control:</b> RRD-2ANF <b>Remote:</b> RD-RD, RD-RS
<b>Power</b>	<b>120 V~ 50/60 Hz:</b> -6ND, -10D, -10ND, -2ANF, -8ANS, -RD, -RS, -PRO <b>120-277 V~ 50/60 Hz:</b> -F6AN-DV, -8S-DV
<b>Typical Power Consumption</b>	<b>Dimmer/Switch/Fan Speed Control:</b> 0.6 W Test conditions: load is off and nightlight mode is enabled. <b>Remote Dimmer/Switch:</b> 0 W Test conditions: load is off.
<b>Regulatory Approvals</b>	UL, CSA (all except -PRO), cUL (-PRO only), NOM, FCC, IC, COFETEL, ANATEL (all except remotes)
<b>Environment</b>	Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0% to 90% humidity, non-condensing. Indoor use only.
<b>Communications</b>	Dimmers and switches communicate with the system through Radio Frequency (RF) and must be located within 30 ft (9 m) of a repeater. Remote dimmers/switches are not required to be within a specific range of a repeater. System devices operate on frequencies between 431.0 MHz and 437.0 MHz.
<b>ESD Protection</b>	Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
<b>Surge Protection</b>	Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
<b>RTISS Equipped</b>	Circuitry compensates in real time for incoming line-voltage variations (neutral connection required). -PRO only.
<b>Power Failure</b>	Power failure memory: should power be interrupted, the control will return to its previous state when power is restored.
<b>Mounting</b>	Requires a U.S. wallbox. 3½ in (89 mm) deep recommended, 2¼ in (57 mm) deep minimum.
<b>Wiring</b>	Use only remote dimmers (-RD) and remote switches (-RS) with dimmers/switches/fan speed controls. Up to 9 -RD or -RS may be used with controls.
<b>Limited Warranty</b>	<a href="http://www.lutron.com/warranty">www.lutron.com/warranty</a> or call 1.844.LUTRON1 (USA/Canada) or +1.610.282.3800 (Others) for a printed copy.

## RadioRA 2 RF Maestro Local Controls

### Design Features

---

#### Dimmer

- On a single-tap, lights fade ON or OFF.
- On a double-tap, lights go to full ON.
- When ON, press and hold the tapswitch to engage the delayed long fade to OFF.
- Light levels can be fine-tuned by pressing and holding the dimming rocker until the desired light level is reached.
- Neutral and two-wire dimmers available.

#### Switch

- On a single-tap, lights or motors turn ON or OFF.
- Neutral and two-wire switches available.

#### Fan Speed Control

- On a single-tap, fan turns ON or OFF.
- Fan speeds can be selected by pressing and holding the fan speed control rocker until the desired fan speed is reached.
- Controls one paddle-type ceiling fan (Permanent split-capacitor motor) up to 2 A. Not for use with shaded-pole type motors (e.g., bath exhaust fans).
- Provides 4 quiet speeds plus OFF.
- Not for use with fans that have integrated fan speed and/or light control modules.
- Requires a neutral connection.

## RadioRA 2 RF Maestro Local Controls

### Dimensions

All dimensions are shown as: in (mm)

### Mounting and Parts Identification

## RadioRA 2 RF Maestro Local Controls

### Ganging and Derating

When combining controls in the same wallbox, derating is required (see **Load Type and Capacity**). No derating is required for remote dimmers, remote switches, or fan speed controls.

### Load Type and Capacity

Load Type	Minimum Load	 <b>A</b> Not Ganged	 <b>B</b> End of Gang	 <b>C</b> Middle of Gang	Neutral Connection
<b>RRD-6ND<sup>1,4</sup></b>					
LED	Varies <sup>5</sup>	150 W	150 W	150 W	Yes
Incandescent/Halogen	10 W	600 W	500 W	400 W	
MLV <sup>2,3</sup>	10 W/VA	450 W/600 VA	400 W/500 VA	300 W/400 VA	
<b>RRD-10D<sup>1</sup></b>					
Incandescent/Halogen	50 W	1000 W	800 W	650 W	No
MLV <sup>2</sup>	50 W/VA	800 W/1000 VA	600 W/800 VA	500 W/650 VA	
<b>RRD-10ND<sup>1,4,6</sup></b>					
LED	Varies <sup>5</sup>	150 W	150 W	150 W	Yes
Incandescent/Halogen	10 W	1000 W	800 W	650 W	
MLV <sup>2,3</sup>	10 W/VA	800 W/1000 VA	600 W/800 VA	500 W/650 VA	

- <sup>1</sup> Dimmer Load Type:
  - -6ND, -10D, -10ND: designed for use with permanently-installed incandescent, LED, MLV, or tungsten halogen only.
  - Note:** Do not install dimmers to control receptacles or motor-operated appliances.
- <sup>2</sup> Low-Voltage Applications:
  - -6ND, -10D, -10ND: use with magnetic (core and coil) low-voltage transformers only. Not for use with electronic (solid-state) low-voltage transformers.
  - Operation of a low-voltage circuit with lamps inoperative or removed may result in transformer overheating and premature failure. Lutron strongly recommends the following:
    - Do not operate low-voltage circuits without operative lamps in place.
    - Replace burned-out lamps as soon as possible.
    - Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to overcurrent.
- <sup>3</sup> Do not mix CFL or LED loads with MLV loads.
- <sup>4</sup> Power Boosters/Load Interfaces: -6ND and -10ND can be used to control power boosters/load interfaces. For a list of compatible power boosters/load interfaces see **Compatible Power Boosters and Load Interfaces**, page 11.
- <sup>5</sup> Minimum load depends on lamp and is not limited to a particular wattage. Refer to the LED Product Selection Tool at [www.lutron.com/ledtool](http://www.lutron.com/ledtool).
- <sup>6</sup> Operating Temperature: -10ND has an extended operating temperature of -4 °F to 104 °F (-20 °C to 40 °C). Additionally, it has an operating temperature of -4 °F to 140 °F (-20 °C to 60 °C) when the load capacity is no greater than 600 W and an operating temperature of -4 °F to 158 °F (-20 °C to 70 °C) when the load capacity is no greater than 300 W.

Continued on next page...

## RadioRA 2 RF Maestro Local Controls

### Load Type and Capacity (continued)

						
Load Type	Minimum Load	A Not Ganged	B End of Gang	C Middle of Gang	Neutral Connection	Required Phase Mode
<b>RRD-PRO</b>						
LED	1 bulb <sup>2</sup>	250 W	200 W	150 W	Optional <sup>1</sup>	Either
CFL	1 bulb <sup>2</sup>	250 W	200 W	150 W	Optional <sup>1</sup>	Forward
MLV Transformer with LEDs	See Application Note #559 (P/N 048559) at <a href="http://www.lutron.com">www.lutron.com</a>				Required	Forward
ELV Transformer with LEDs	No Derating Required					Reverse
MLV Transformer with Halogen	10 W	400 VA (300 W)	No Derating Required		Required	Forward
ELV Transformer with Halogen	10 W	500 W	400 W	300 W	Required	Reverse
Incandescent/Halogen	5 W <sup>2</sup>	500 W	400 W	300 W	Optional <sup>1</sup>	Either
Dimmable Fluorescent Ballast	1 ballast	3.3 A (400 VA)	No Derating Required		Required	Forward
Hi-lume 1% 2-wire (LTE) LED Driver	1 driver	3.3 A (400 W) 20 drivers max.	No Derating Required		Required	Forward
PHPM-PA/3F and GRX-TVI <sup>3</sup>	1 interface	3 interfaces	No Derating Required		Required	Forward

**Notes for dimming MLV fixtures:**

- The total VA rating of the transformer(s) shall not exceed the VA rating of the dimmer. The VA rating of the transformer should be written on the nameplate label or determined by contacting the manufacturer. The maximum halogen lamp wattage is typically 70% - 85% of the transformer's VA rating.
- MLV transformer loads powered by utility power and emergency backup generators should have a minimum 1 second delay between switching power sources. Rapid non-synchronous switching can cause the transformers to draw high currents which would cause breakers to trip or the dimmers controlling them to trip a protection.

<sup>1</sup> Neutral is recommended for best dimming performance, if available, but is not required for this load type.

<sup>2</sup> Minimum load shown is for neutral connected operation. If no neutral is used, minimum load is 2 bulbs LED/CFL, or 25 W Incandescent/Halogen.

<sup>3</sup> Power Boosters/Load Interfaces: -RRD-PRO can be used to control power boosters/load interfaces. For a list of compatible power boosters/load interfaces see **Compatible Power Boosters and Load Interfaces**, page 11.

## RadioRA 2 RF Maestro Local Controls

### Load Type and Capacity (continued)

-8ANS and -8S-DV have fins that need to be removed for multigang installations. Do not remove outside fins on ends of ganged controls (shaded areas).

Load Type	Minimum Load	A Not Ganged	B End of Gang	C Middle of Gang	Neutral Connection
<b>RRD-F6AN-DV<sup>1,2,3</sup></b>					
Fluorescent/LED Drivers	0.05 A	6 A	5 A	3.5 A	Yes
	1 ballast	60 ballasts	50 ballasts	35 ballasts	
<b>RRD-2ANF<sup>4</sup></b>					
Ceiling Fan	0.083 A	2 A	2 A	2 A	Yes
<b>RRD-8ANS<sup>1,5</sup></b>					
Lighting	10 W	8 A	6.5 A	5 A	Yes
Motor	0.08 A	1/4 HP 5.8 A	1/4 HP 5.8 A	1/6 HP 4.4 A	
<b>RRD-8S-DV<sup>5,6</sup></b>					
Lighting	40 W/VA	8 A	8 A (2-gang); 7 A (3-gang)	7 A	No
Motor	0.4 A	1/10 HP 3 A			

**Note:** Do not install dimmers to control receptacles or motor-operated appliances.

- <sup>1</sup> Power Boosters/Load Interfaces: -F6AN-DV, -8ANS can be used to control power boosters/load interfaces. For a list of compatible power boosters/load interfaces see **Compatible Power Boosters and Load Interfaces**, page 11.
- <sup>2</sup> Fluorescent Dimmer Load Type: -F6AN-DV: designed for use with permanently installed 3-wire 120 V~ or 277 V~ line voltage control fluorescent ballasts or LED drivers. Use with only Hi-lume, Hi-lume 3D, Hi-lume Compact SE, Eco-10, or EcoSystem (H3D-, FDB-, ECO-, HL3-, EC5-, L3D). Do NOT use with any other ballasts or drivers. Do not install to control receptacles or motor-operated appliances.
- <sup>3</sup> Maximum Load: The maximum load for the -F6AN-DV is either the derated load or the number of ballasts, whichever is LESS.
- <sup>4</sup> Ceiling Fan Application: -2ANF
  - Use to control one paddle-type ceiling fan (permanent split-capacitor).
  - Use the ceiling fan's pull chain to set its speed to the highest setting.
  - Do not use to control fans that use shaded-pole motors (e.g., bath exhaust fans).
  - Do not use to control fans that have integrated fan speed controls (e.g., fans that have a remote control) unless the integrated control is removed from the ceiling fan.
  - Do not connect to any other motor-operated appliance or to any lighting load type.
  - Do not use to control a fan lighting load (e.g., light kit).
- <sup>5</sup> Switch Load Type:
  - -8ANS, -8S-DV: designed for use with permanently installed 120 V~ incandescent, MLV, ELV, tungsten halogen, fluorescent, CFL, LED, or motor loads.
  - -8S-DV can also be used with permanently installed 277 V~ MLV or fluorescent loads.
- <sup>6</sup> Shunt Capacitor: Some -8S-DV installations may require the use of a shunt capacitor; this is especially necessary for load types sensitive to leakage current (e.g., fluorescent ballasts). If load flickers, install a shunt capacitor. Optional shunt capacitor must be installed inside the load fixture or in a separate J-box. For shunt capacitor installation see Wiring Diagram 4, 9, or 10. If controlling Type B TLED bulbs, consult Application Note #812 (P/N 048812) on [www.lutron.com](http://www.lutron.com).

Continued on next page...

## RadioRA 2 RF Maestro Local Controls

### Mixing Lamp Types

Mixing lamp types (using a combination of CFL/LED, Incandescent/Halogen bulbs) and ganging with other dimmers or electronic switches may reduce maximum wattage as shown in the chart below.

Example: If you have two dimmers ganged together and you have two 24 W bulbs installed (total CFL Wattage = 48 W), on one dimmer, you may add up to 300 W of incandescent or halogen lighting to that one dimmer. Repeat the exercise for the other dimmer with which it is ganged.

Total CFL/LED Wattage	Total Incandescent/Halogen Wattage			Neutral Connection
	A Not Ganged	B End of Gang	C Middle of Gang	
<b>RRD-PRO</b>				
0 W	+ 5 W <sup>1</sup> – 500 W	Or 5 W <sup>1</sup> – 400 W	Or 5 W <sup>1</sup> – 300 W	Optional
1 W – 50 W	+ 0 W – 400 W	Or 0 W – 300 W	Or 0 W – 200 W	
51 W – 100 W	+ 0 W – 300 W	Or 0 W – 200 W	Or 0 W – 100 W	
101 W – 150 W	+ 0 W – 200 W	Or 0 W – 100 W	Or 0 W	
151 W – 200 W	+ 0 W – 100 W	Or 0 W	Or 0 W	
201 W – 250 W	+ 0 W	Or 0 W	Or 0 W	

<sup>1</sup> Minimum load shown is for neutral connected operation. If no neutral is used, minimum load is 2 bulbs CFL/LED, or 25 W incandescent/halogen.

## RadioRA 2 RF Maestro Local Controls

### Compatible Power Boosters and Load Interfaces

Some local controls can be used to control power boosters or load interfaces. Up to three power boosters or load interfaces can be used with one control. See table below for a list of controls and compatible power boosters and load interfaces.

Control	Phase Adaptive Power Modules: PHPM-PA-120-WH; PHPM-PA-DV-WH	3-wire Fluorescent Power Modules: PHPM-3F-120-WH; PHPM-3F-DV-WH	Switched Power Module: PHPM-SW-DV-WH	0–10 V <sub>DC</sub> Interface and Switching Module: GRX-TVI
RRD-6ND	✓	✓		✓
RRD-10ND	✓	✓		✓
RRD-F6AN-DV <sup>1</sup>	✓	✓		✓
RRD-8ANS			✓	
RRD-PRO	✓	✓		✓

<sup>1</sup> Only the GRX-TVI is compatible with the RRD-F6AN-DV at 277 V<sub>AC</sub>. All other power modules are not rated for a 277 V<sub>AC</sub> control voltage. For power module ratings, see specification submittal P/N 369835 at [www.lutron.com](http://www.lutron.com).

## RadioRA 2 RF Maestro Local Controls

### Operation

#### Dimmer

#### Switch

#### Fan Speed Control

**Important Notice**

FASS: Front Accessible Service Switch

To replace bulb, remove power by pulling the FASS out fully on all controlling devices.

After replacing bulb(s), push the FASS back in fully to restore power to the control(s).
